325design.sql: SQL file to set up the tables (Events, Favored_Customers, etc.) used in the database.

325populate.sql: SQL file to populate the tables.

325scenario.txt: Text file containing a description of the "Tommy's Desserts" business.

325biz-rules.pdf: List of business rules for the scenario.

325queries.sql: List of example SQL queries.

325query-results.txt: Text file showing results of 325queries.sql.

325report1.sql, 325report2.sql, 325report3.sql: Three SQL files showing example reports for this project.

325report1-results.txt, 325report2-results.txt, 325report3-results.txt: Three text files showing the output of the three reports.

325design.rs: Shows design of the tables and their columns in relation-structure form.

325show-contents.sql: SQL file containing select statements that output everything in the database.

325result-contents.txt: Text file showing the output of 325show-contents.sql.

325discussion.txt: Text file explaining the uses of this database.

325model.pdf: Image file showing the ERD model of this database.

To run this database, simply start 325design.sql in SQLplus, and then start 325populate.sql in SQLplus. To run the queries, start 325queries.sql in SQLplus. To run the reports, start 325report1.sql, then 325report2.sql, and then 325report3.sql in SQLplus.
